Activities & Leadership

- **Google CodeIn 2018 Mentor:** Mentor under CCExtractor; responsible for creating tasks based on previous Google Summer Of Code projects and CCExtractor repository, assigning tasks to participants and helping them through the way to completion of the tasks.
- **Mentored in GirlScript Summer of Code:** Mentored students to build GirlScript's website; responsible for creating issues to foster streamlined development, and guiding students to complete them. Received the accolade of being in the top 10 mentors of the program.
- **Founder, CodeStash IIT Kharagpur:** Created a community in my freshman year to promote competitive coding and increase awareness about various fields of computer science (inspiration from code.org).
- **Active Member, MetaKGP IIT Kharagpur:** Responsible for fostering participation, promoting the growth of the open group and maintaining the following projects: eva, mftp, chillzone and ERP Auto Login.

Projects

- **DigiCon, OpenSoft 2018 IIT Kharagpur**
Gold winning entry (out of 13 entries) to the Inter Hall Opensoft, IIT Kharagpur. The project intelligently parses different parts of a doctor's prescription (written by hand) and is an amalgamation of multiple technologies such as OpenCV, Flask, Natural Language Processing, REST API, bash scripting and Docker.
- **Games Using PyGame And Python**
Worked on two projects; AirHockey and BrkOut. Learned basic mechanisms of physics programming and graphic development along with introduction to cryptography.
- **Salvator: Automated Task of Birthday Wishing**
Salvator is a bot which uses puppeteer (headless Chrome JS API) to scrape the list of birthdays from Facebook and sends them a personal message. It also sends the user an email notification with the list of birthdays and their profile link.
