Experience

May 18 Aug 18	**Student Developer: Project Nephos** **CCExtractor, Google Summer Of Code 2018** - A client to automate the process of recording, processing and uploading IPTV streams for Universities under Red-Hen Labs, project closely supported by University Of Nevarra, Spain. - Learned extensive error handling, database management, remote server operations, FTP handling in Python, scheduling of jobs and maintaining elaborate logs to ease debugging.

Projects

- **DigiCon, OpenSoft 2018 IIT Kharagpur**
  Gold winning entry (out of 13 entries) to the Inter Hall Opensoft, IIT Kharagpur. The project intelligently parses different parts of a doctor's prescription (written by hand) and is an amalgamation of multiple technologies such as OpenCV, Flask, Natural Language Processing, REST API, bash scripting and Docker.
- **Messiah, Microsoft CodeFunDo++ 2018**
  A service that predicts the magnitude of Earthquake using Tensorflow. Had the opportunity to learn optimization of web services; backend and frontend, reducing loading time by 2.5x.
- **Games Using PyGame And Python**
  Worked on two projects; AirHockey and BrkOut. Learned basic mechanisms of physics programming and graphic development along with introduction to cryptography.
- **Salvator: Automated Task of Birthday Wishing**
  Salvator is one of the many task-automation bots I've created; sends birthday wishes. Other notable tasks accomplished via automation include Google form filling, Facebook group auto-posting, twitter quotes' bot and many more.
